

Big Castle

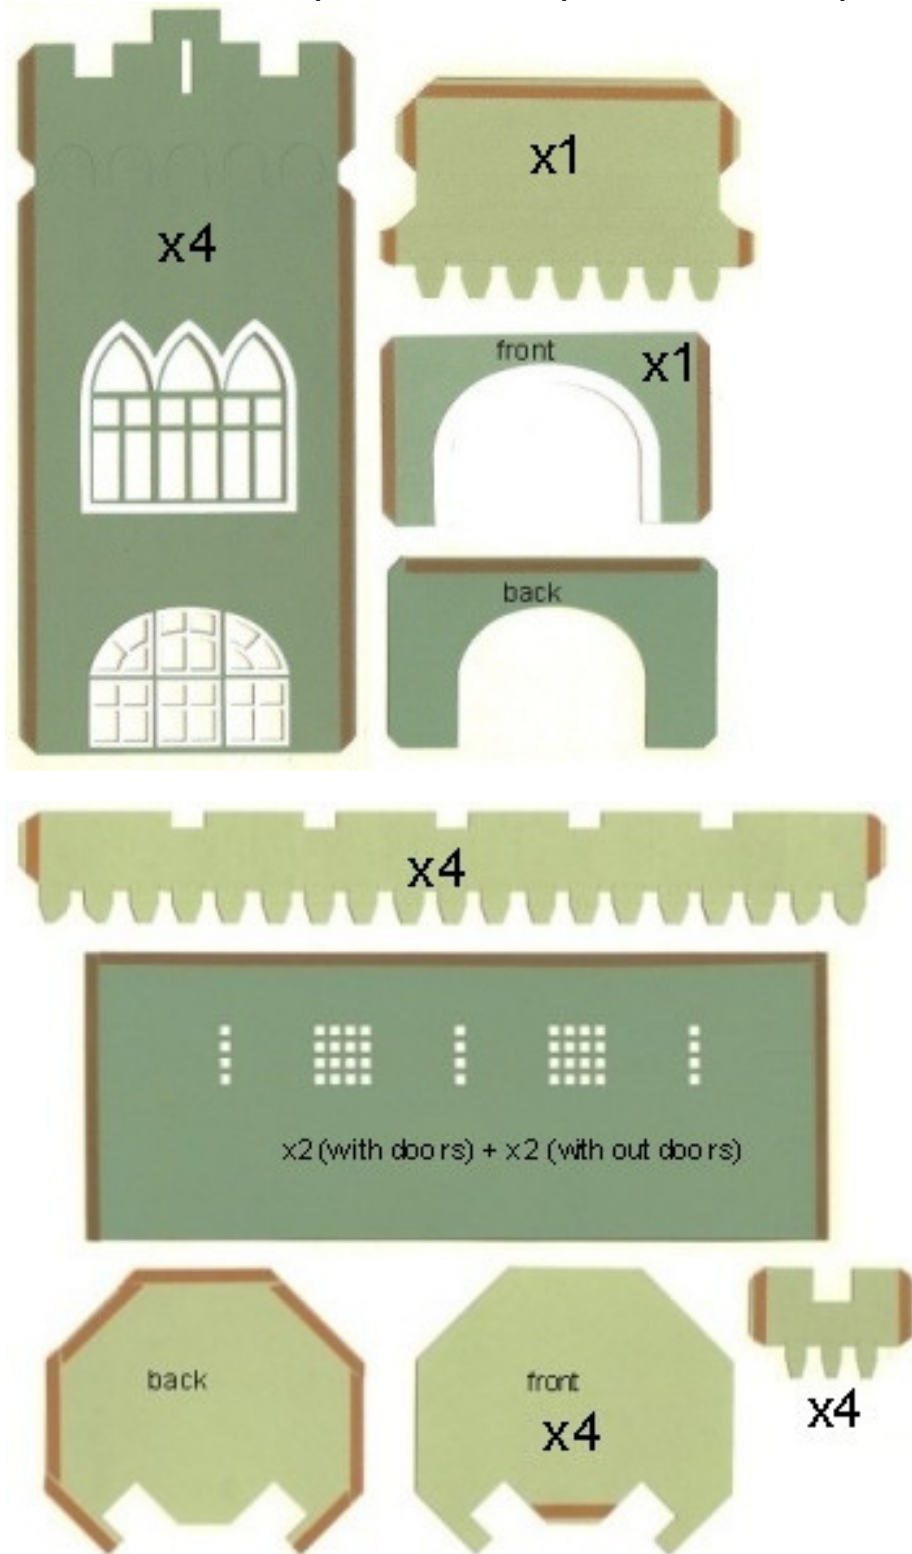

A picture from Kilkenny castle in Ireland has inspired me to make this paper castle. I have used an ultra sticky double sided tape and a glue pen when I assembled all the parts.

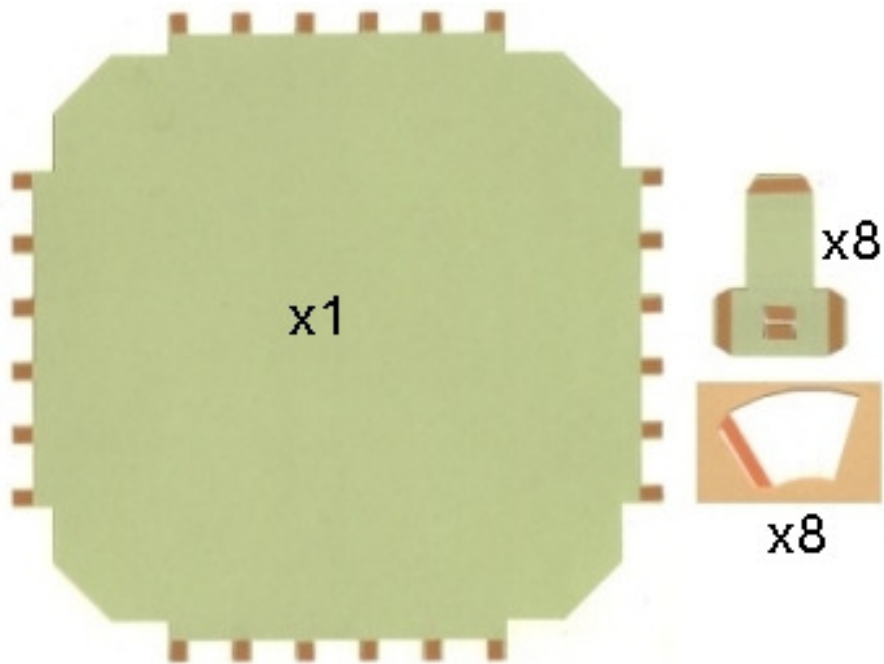

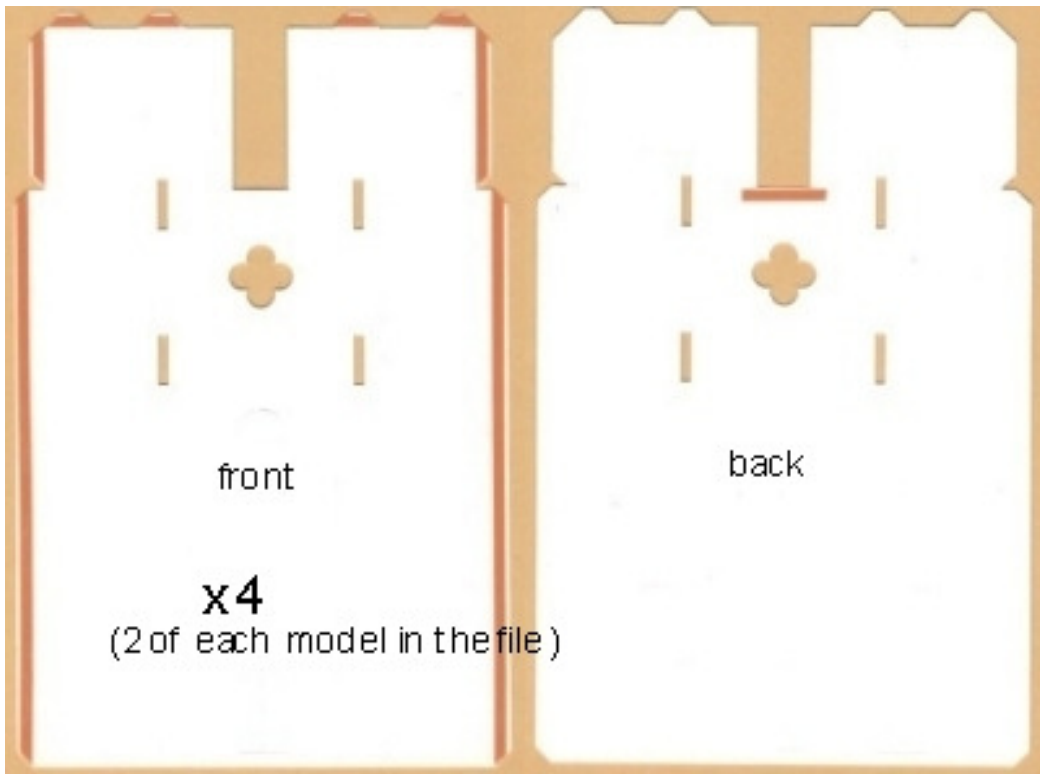

Where to put the glue on

Cut out all the parts before mounting. You can see on the pictures below how many of each part to cut.

Put on double sided tape as shown in the pictures. Some of the parts have tape on both sides.

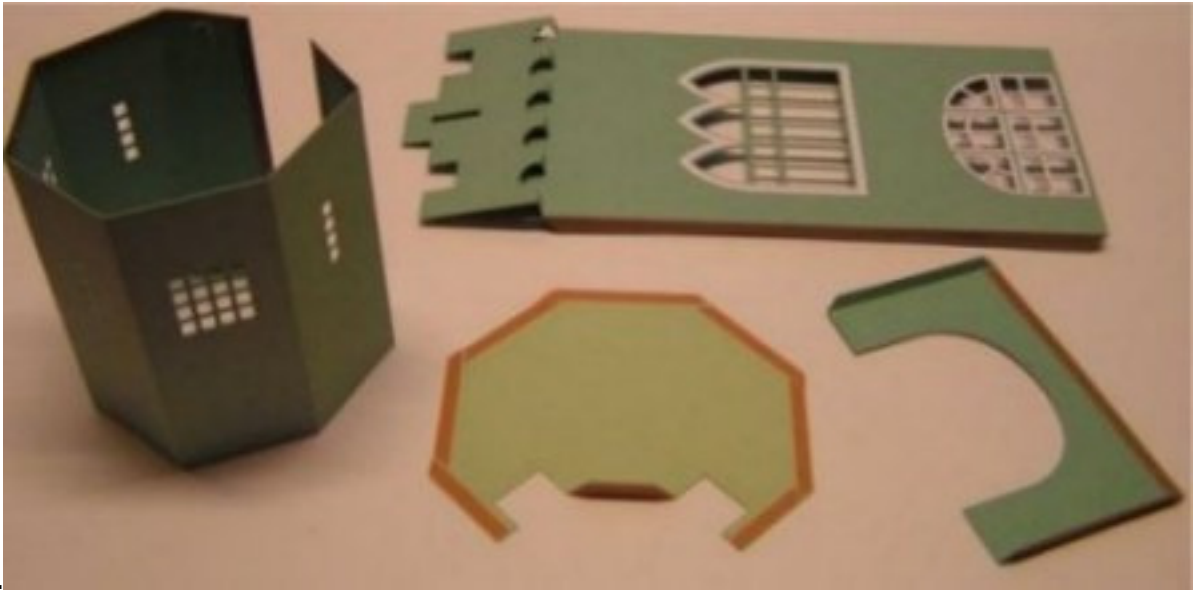

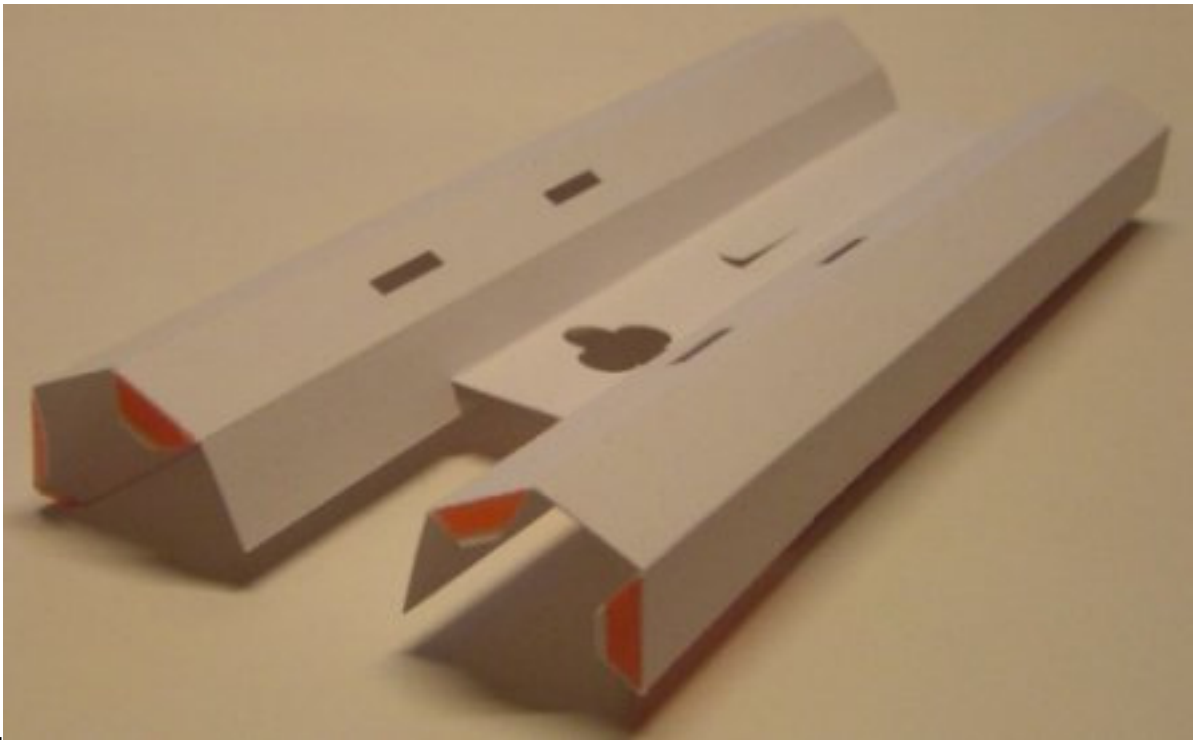

Folding

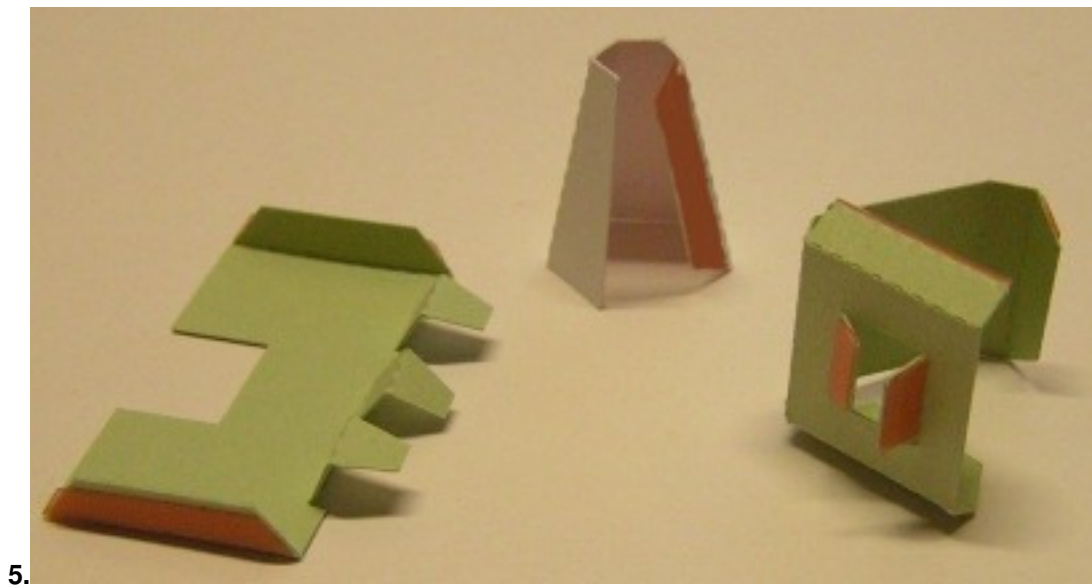

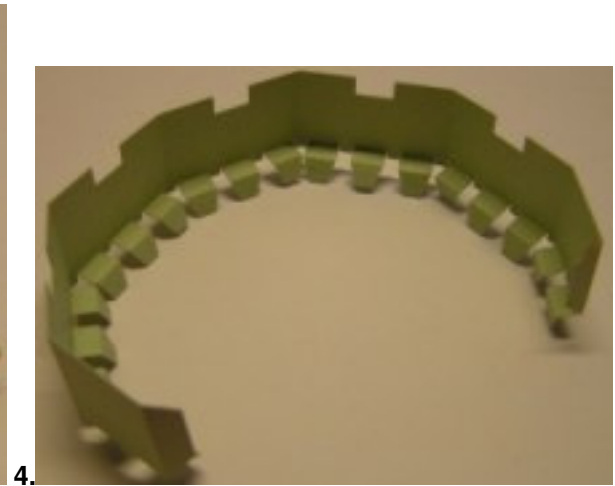

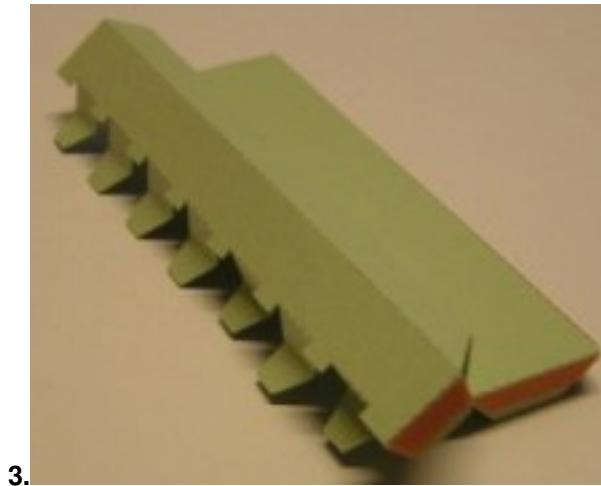

Fold all parts as shown in the pictures.

1.

2.

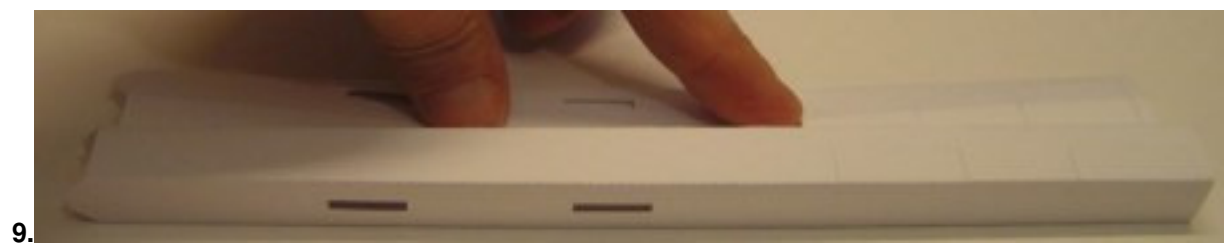

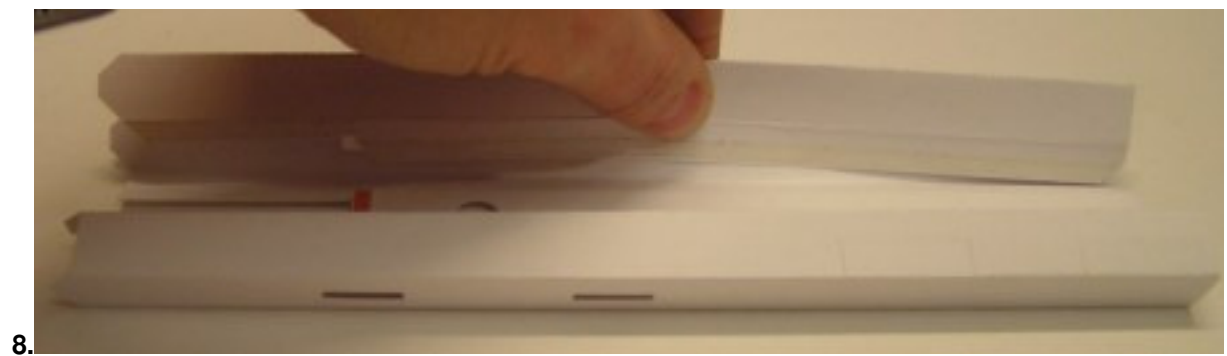

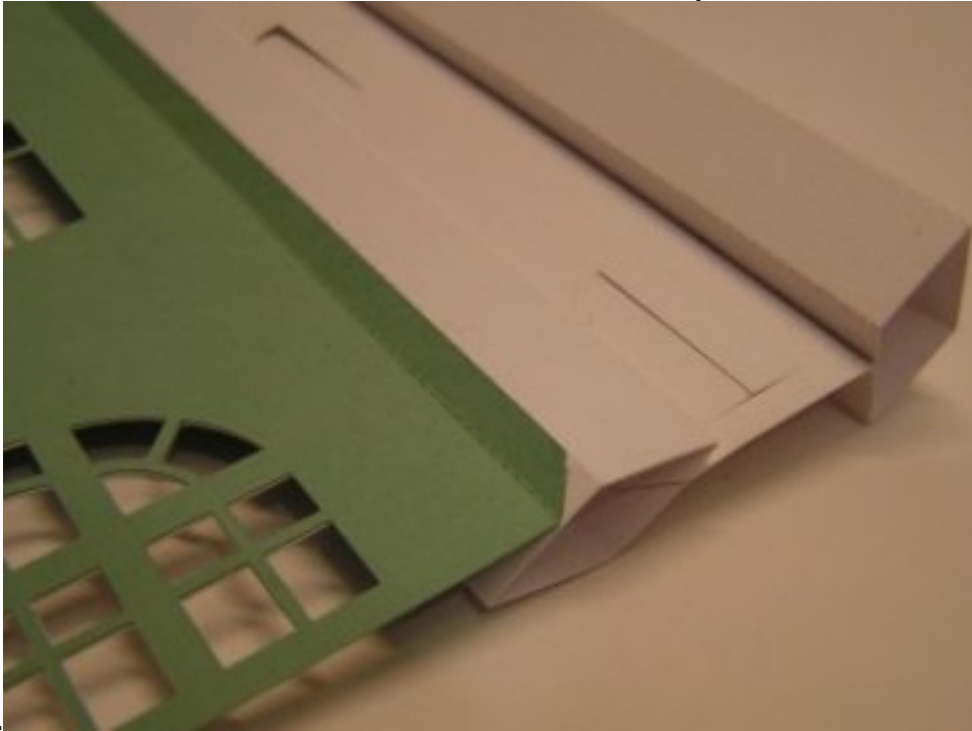

Mounting

Start with the corner wall section. Fold as pictures.

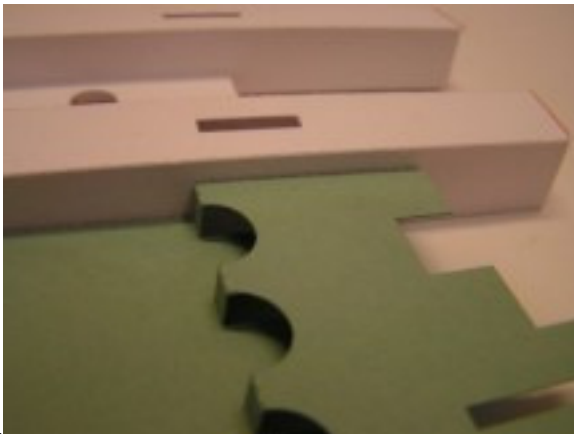

Assemble the mid wall section to the corner wall as in pictures.

12.

13.

14.

15.

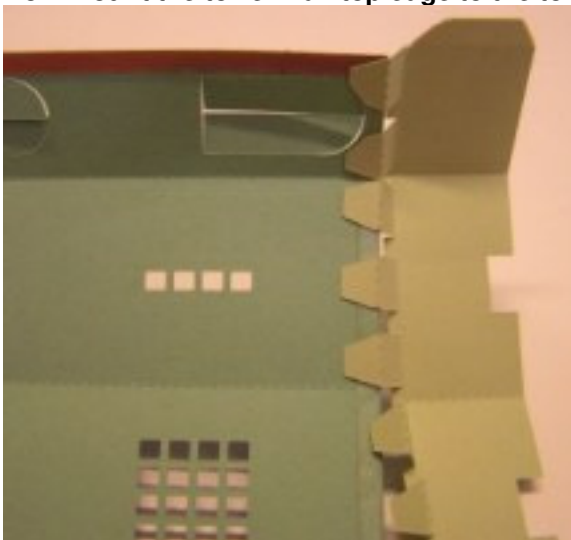

Do the same with the other two corner sections, those who have indentations as in pic. 11.

Mount the last two mid wall sections to the rest and it will look like this:

16.

Now mount the tower wall top edge to the tower walls.

17.

18.

Mount the tower walls to the corner walls.

19.

20.

Be sure to put the two walls with doors on the corner walls which have the indentations.

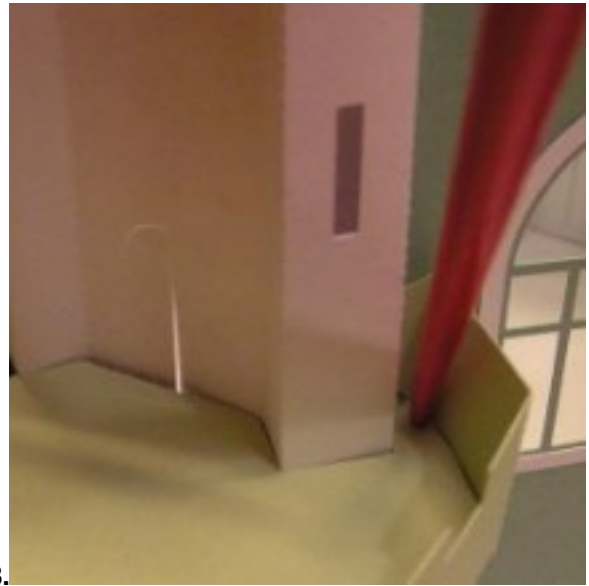

21.

Now it is time for the trickier part i think, to put the tower roofs in and mount the entrance. It's handy to have a pointed tool to push down the roof.

22.

23.

Put the entrance parts together as in pic. 24. Mount the edge nearest the mid section (the arrow in pic. 25), then mount the floor between the doors. The floor have to be fixed just under the doors. Attach the sides as in pic. 26.

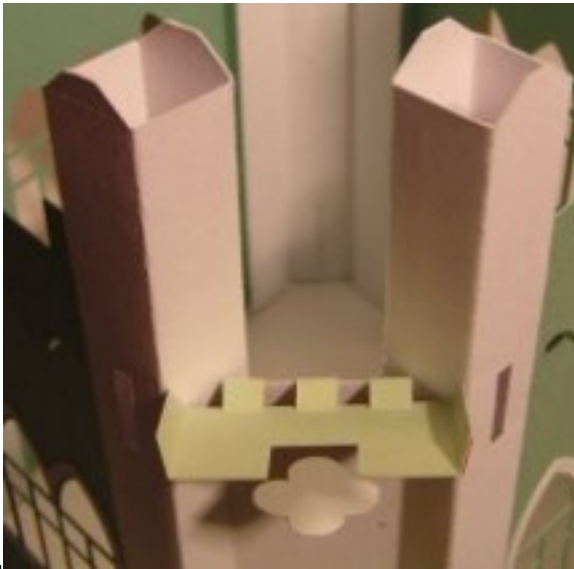

24.

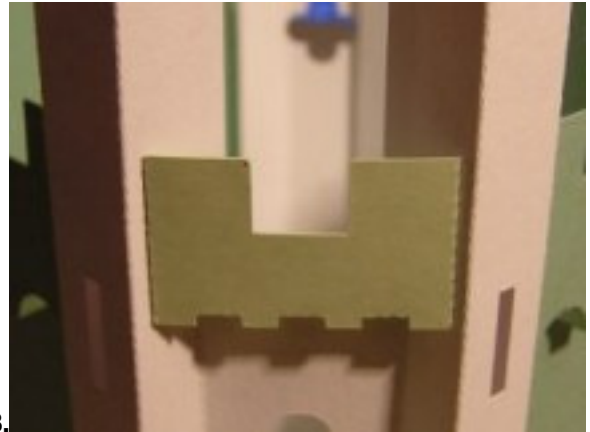

25.

26.

27.

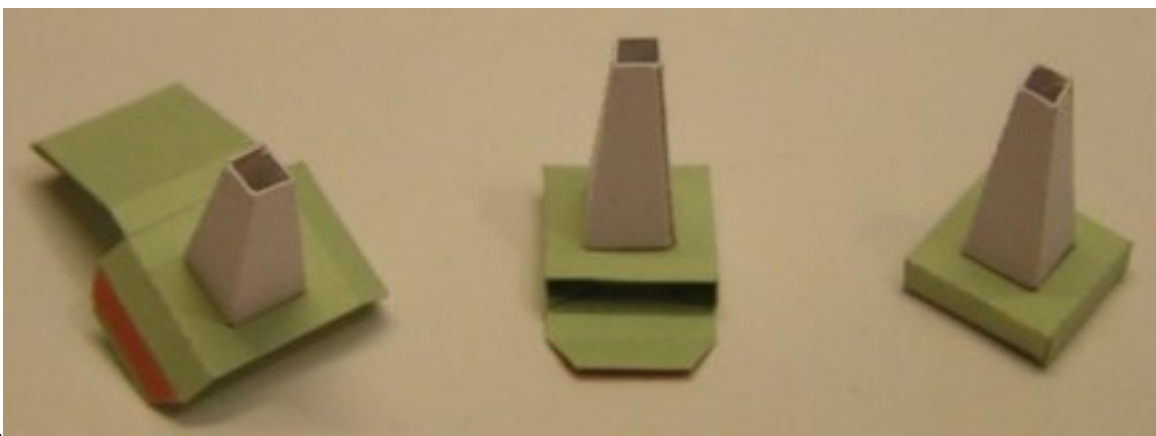

28.

Put the top roof in.

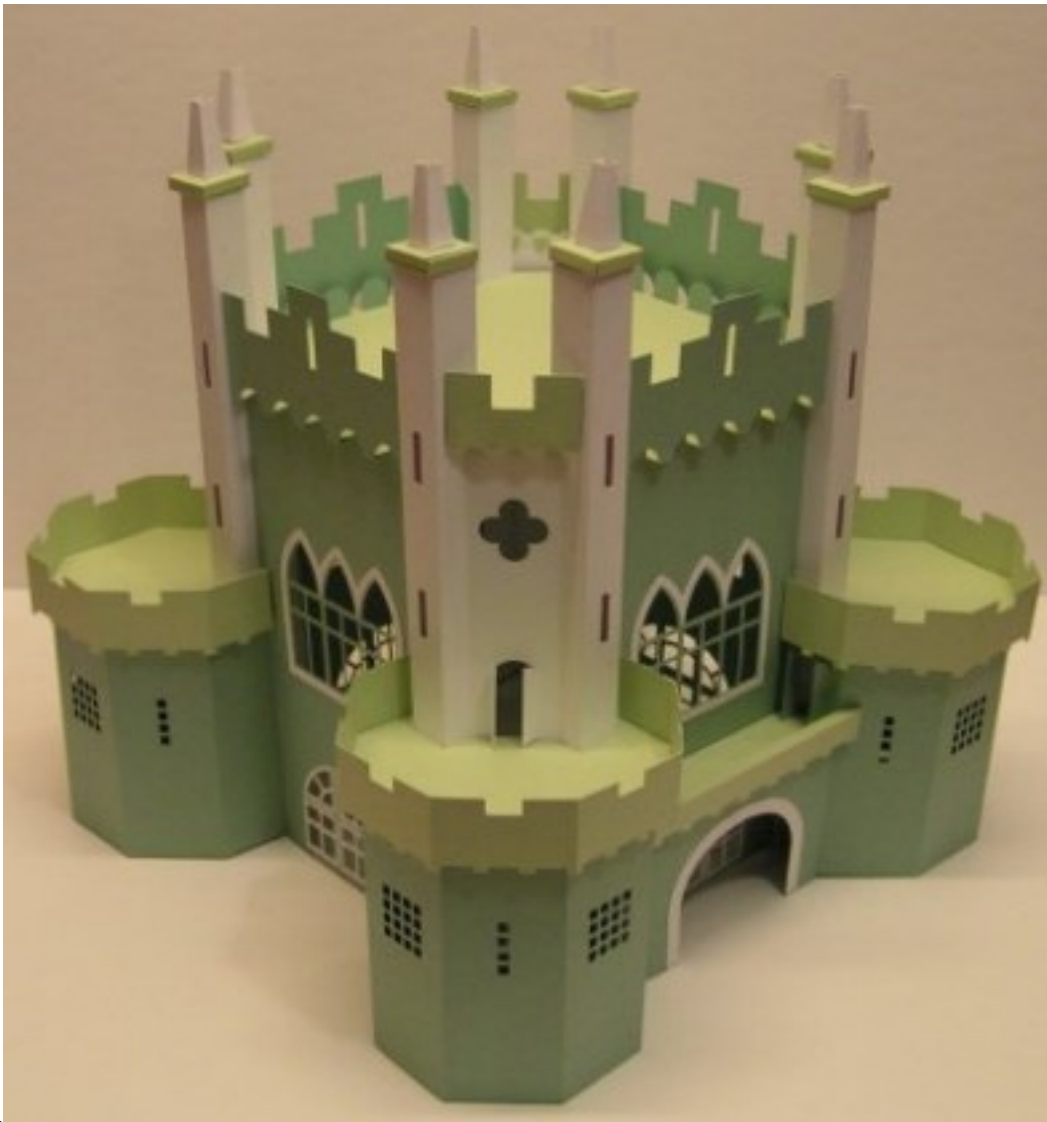

29.

30.

Done!
